

HEROLD PRECISION METALS is ITAR Registered

As a leader in the precision sheetmetal fabrication Industry Herold Precision Metals is proud to be a supplier of components and assemblies for defense application.

ITAR - The International Traffic in Arms Regulations is a set of regulations that govern the export and re-export of controlled commodities, services, and technologies. In order to be ITAR as a defense article, a given component or assembly must be specifically designed for military application controlled under the United States Munitions Control Act (USML).
